We Are Different

A close-up photograph of a red pencil standing vertically in the center, surrounded by a dense field of grey pencils. The red pencil is the only one in focus, with its sharp tip pointing upwards. The background pencils are blurred, creating a sense of depth and highlighting the red pencil as the 'different' one.

Our Projects

Our projects reflect our range of experience and showcase our willingness to take on new challenges.

CX TRAINING LAB

Providing airlines and training centers with reliable, high-efficiency cabin crew training mockups at a low cost

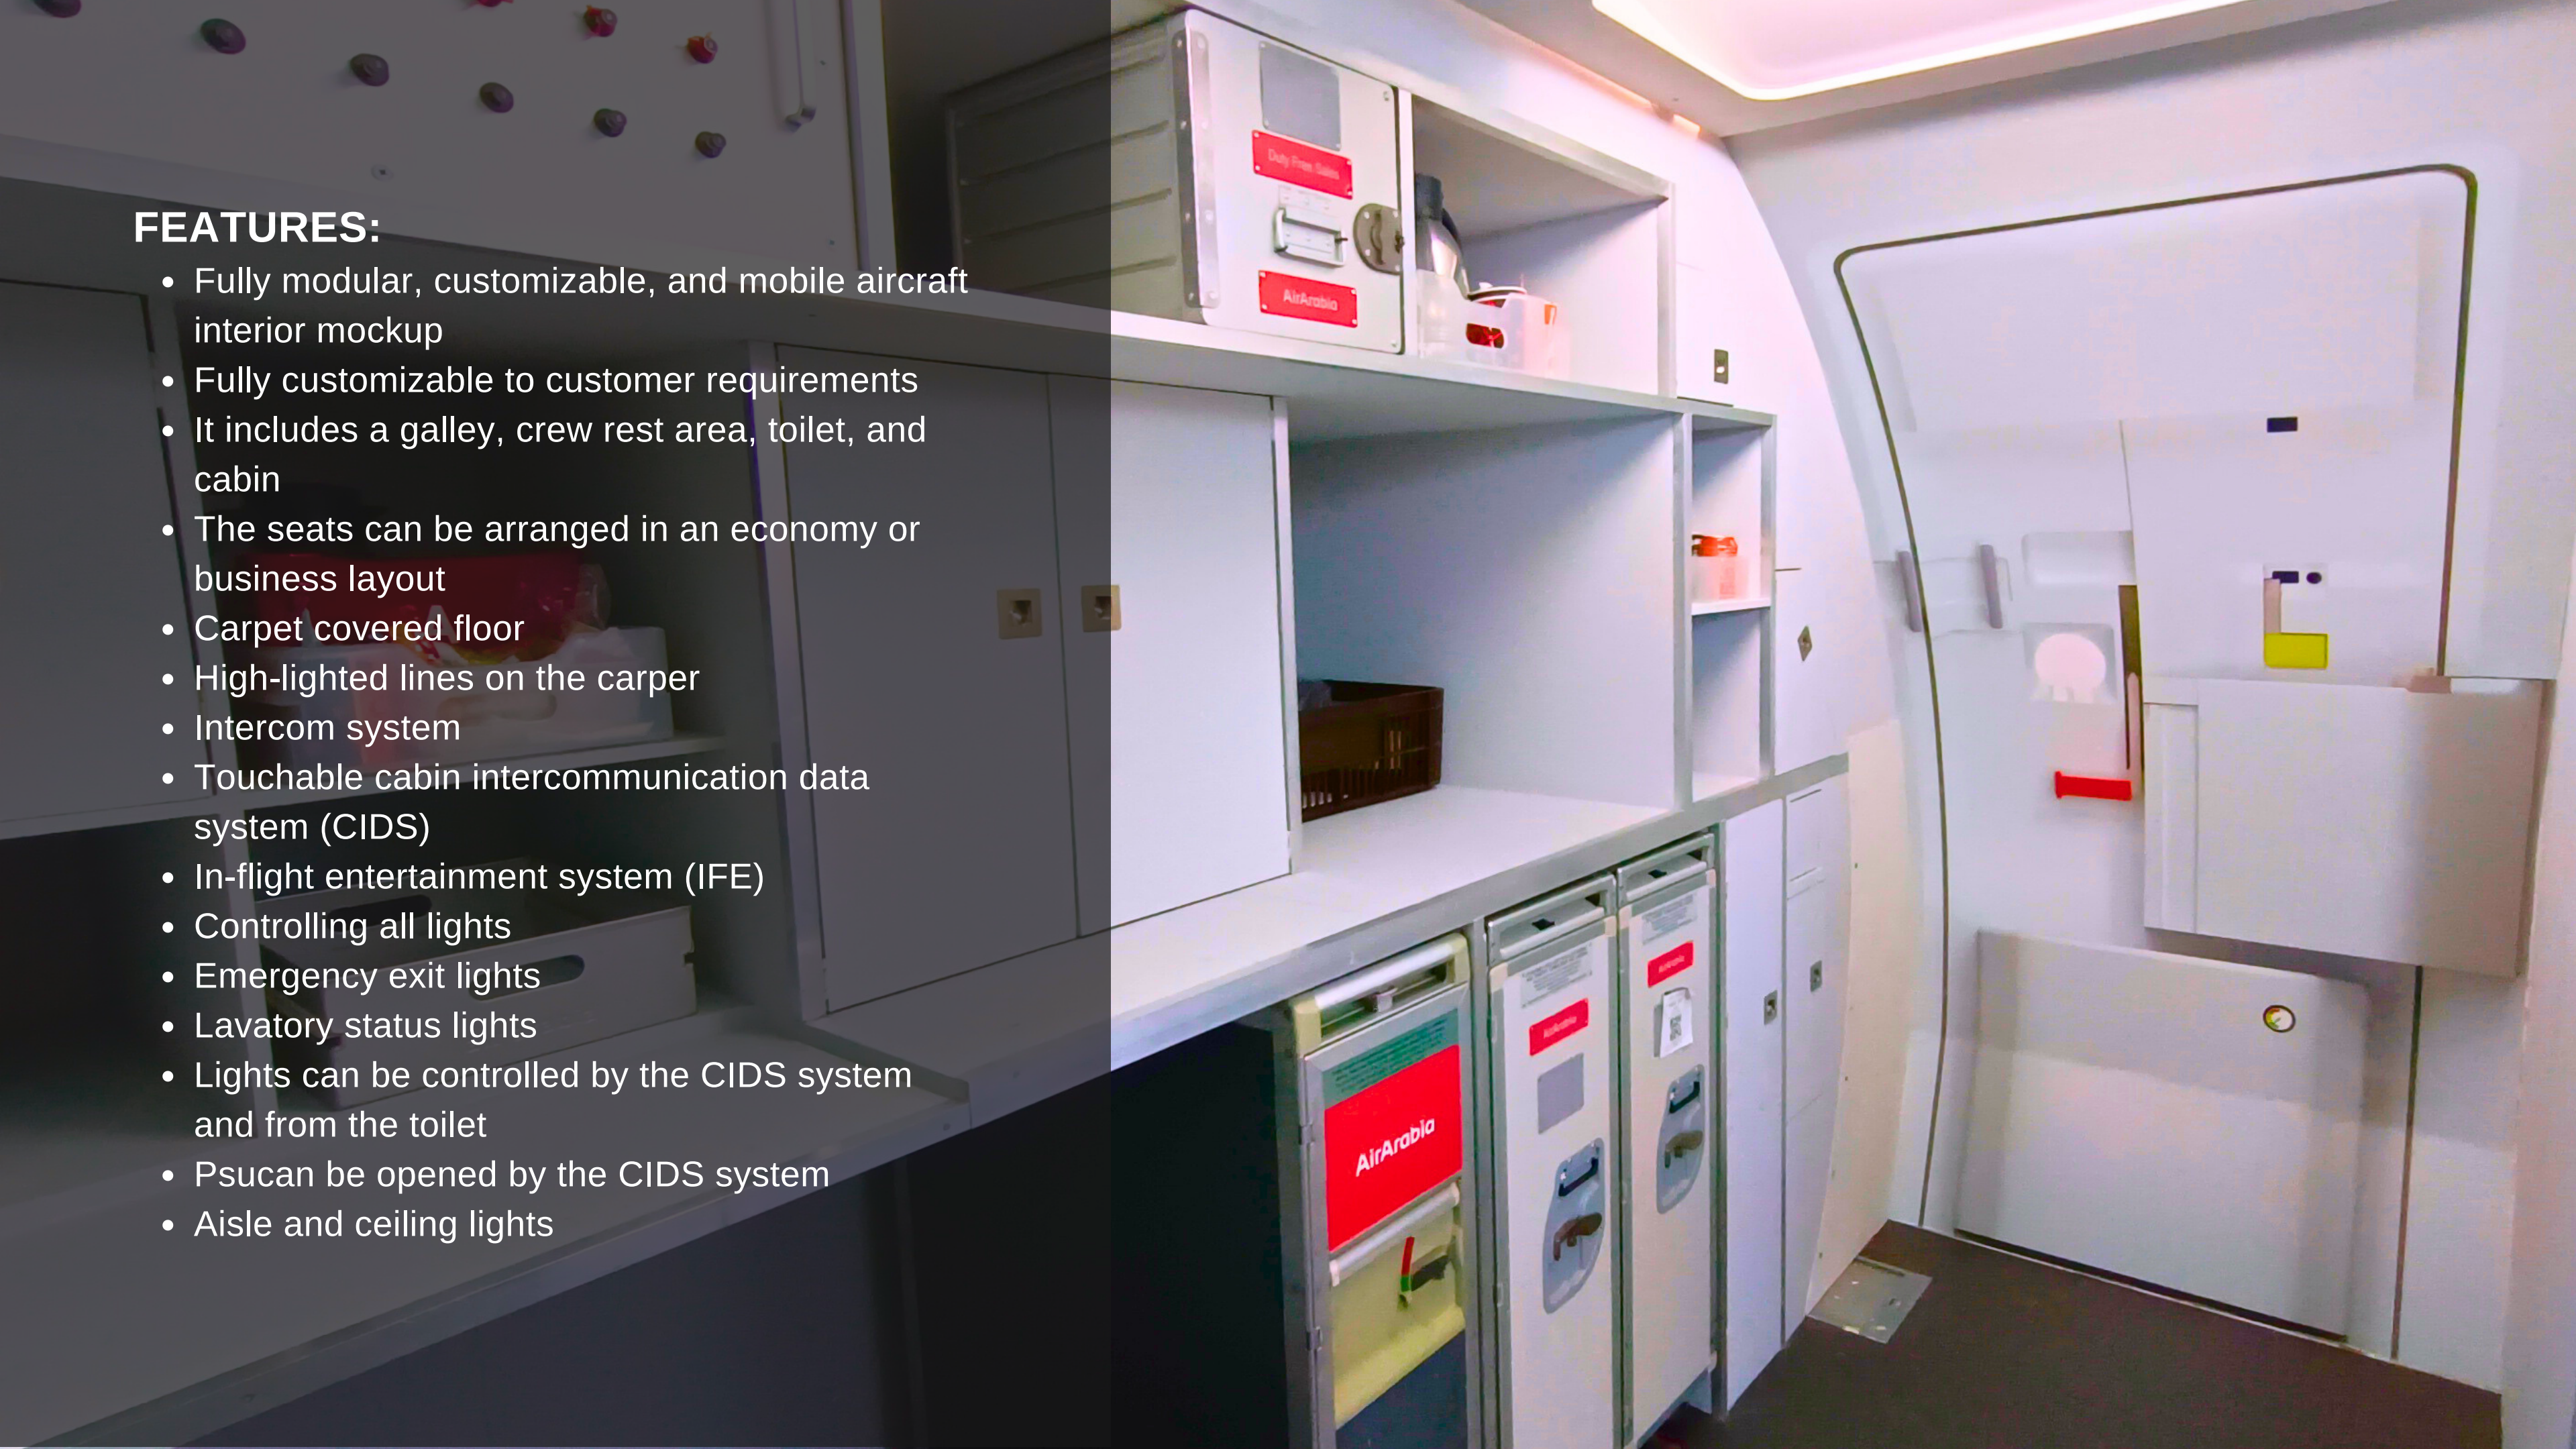

A320/A321 Cabin Mockup - Air Arabia PJSC.

Cabin Mockup is an essential piece of equipment in aviation training, it can be used in safety training for cabin crew, or it can be used in in-flight service training for cabin crew, or it can be used in deep cleaning training for aircraft cleaning teams. The Cabin Mockup was certified by the local civil aviation authority and received satisfaction from Air Arabia.

FEATURES:

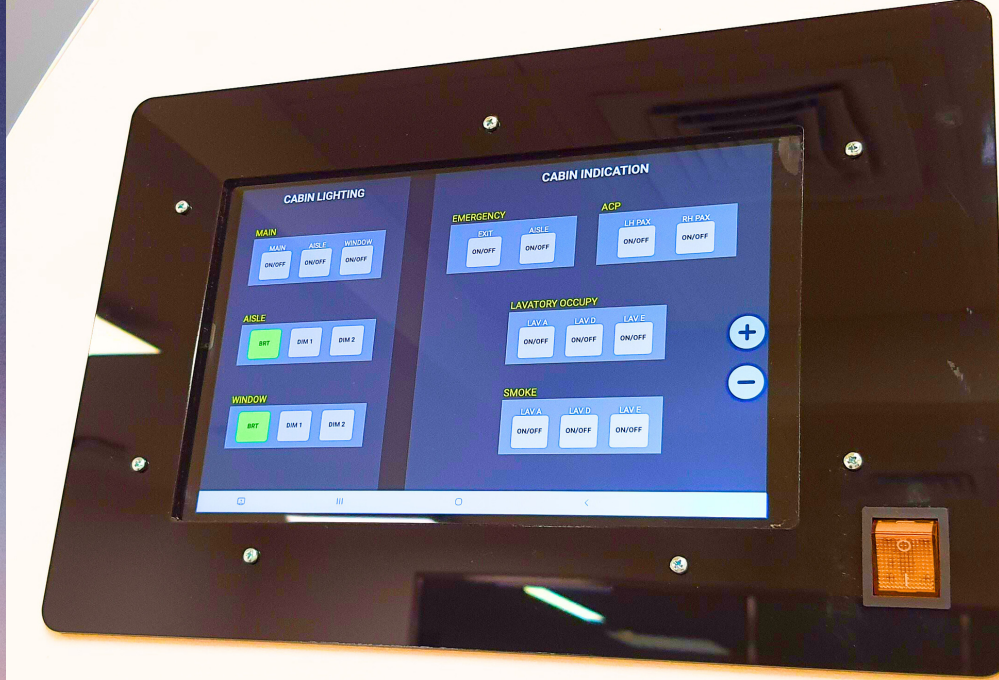

- Fully modular, customizable, and mobile aircraft interior mockup
- Fully customizable to customer requirements
- It includes a galley, crew rest area, toilet, and cabin
- The seats can be arranged in an economy or business layout
- Carpet covered floor
- High-lighted lines on the carper
- Intercom system
- Touchable cabin intercommunication data system (CIDS)
- In-flight entertainment system (IFE)
- Controlling all lights
- Emergency exit lights
- Lavatory status lights
- Lights can be controlled by the CIDS system and from the toilet
- Psucan be opened by the CIDS system
- Aisle and ceiling lights

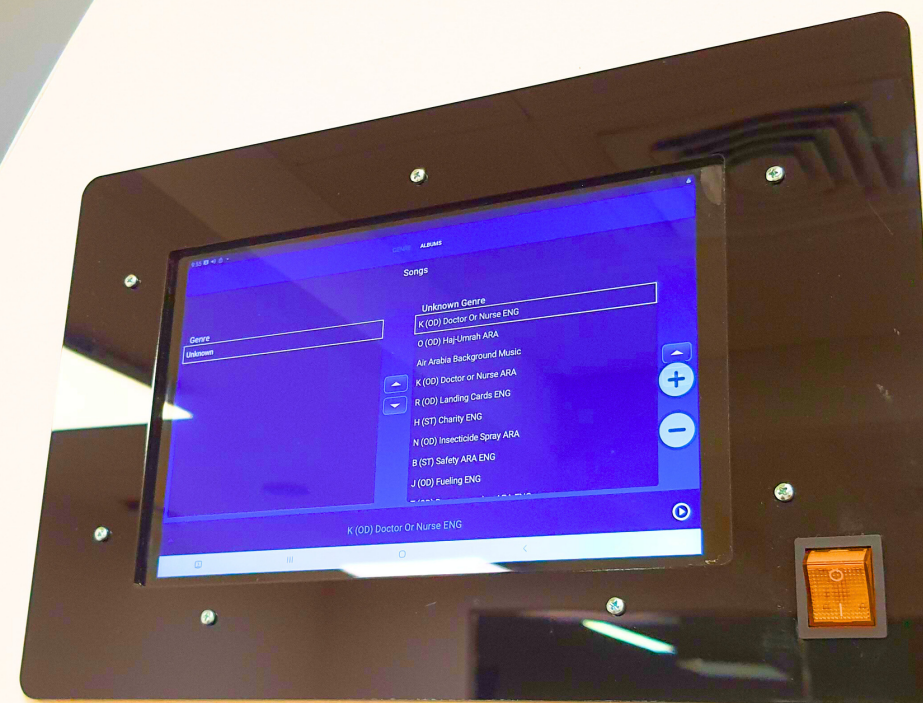

ALL CABIN LIGHT CONTROLS

Our cabin service trainer can simulate cabin lighting, call lights, communications system and inter-phone system, via an intuitive touch control panel.

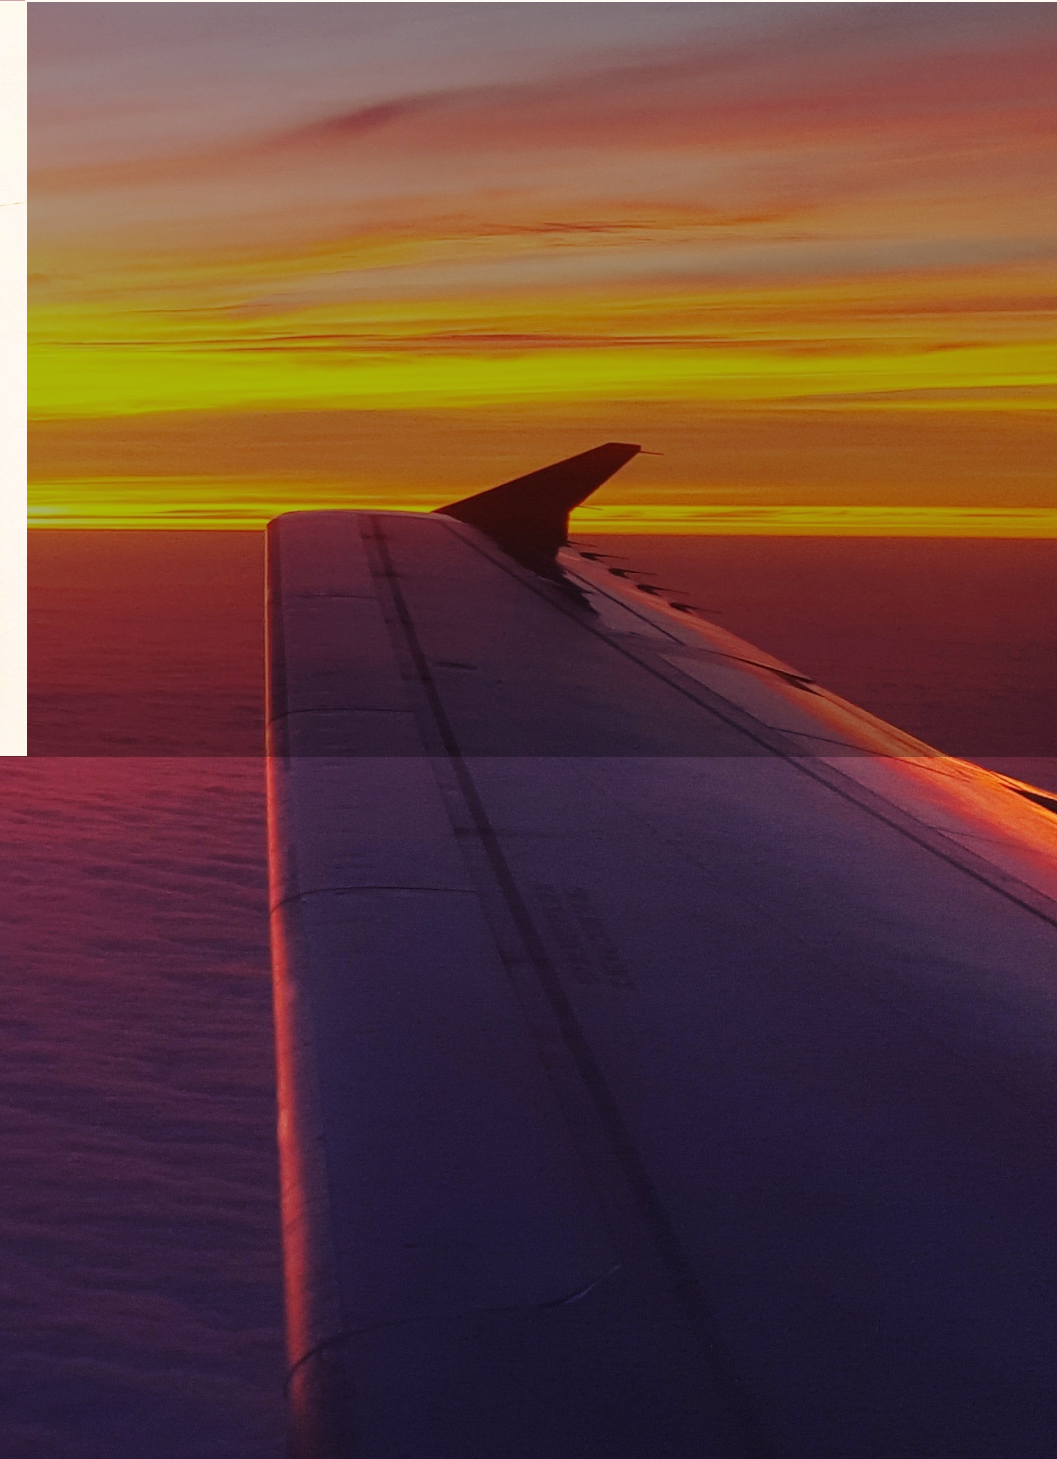

IN-FLIGHT ENTERTAINMENT SYSTEM

Our cabin service trainer features a full functional In-Flight Entertainment (IFE) system, via an intuitive touch control panel.

FUNCTIONAL CIRCUIT BREAKER PANEL

Our cabin service trainer features a fully functional circuit breaker panel for controlling all systems.

Airbus A318/A319/A320/A321 Overwing Exit Trainer - **Air Arabia PJSC.**

A door trainer is a sectional mock-up of the aircraft's main entry and/or emergency exit doors, allowing the crew to get training on a specific aircraft door type and how best to operate them in emergencies. Cabin crew must be provided with the specific safety training for the aircraft type they are flying, Khbrat provides the most realistic environment for that purpose.

Robust, Reliable and Instructor Friendly

The Overwing Exit Door Trainer is designed and manufactured based on the original Airbus Data Sheets.

All functions and operating procedures are identical to those of the original aircraft.

All potential malfunctions can be simulated most realistically.

Various scenarios such as ditching, emergency landing, obstacle or fire outside, blocked exit, slide inflation failure, etc.

Fulfills all requirements of the Regulators for training with emergency exit doors.

ALTITUDE 3D Printer - **Ultzine LLC.**

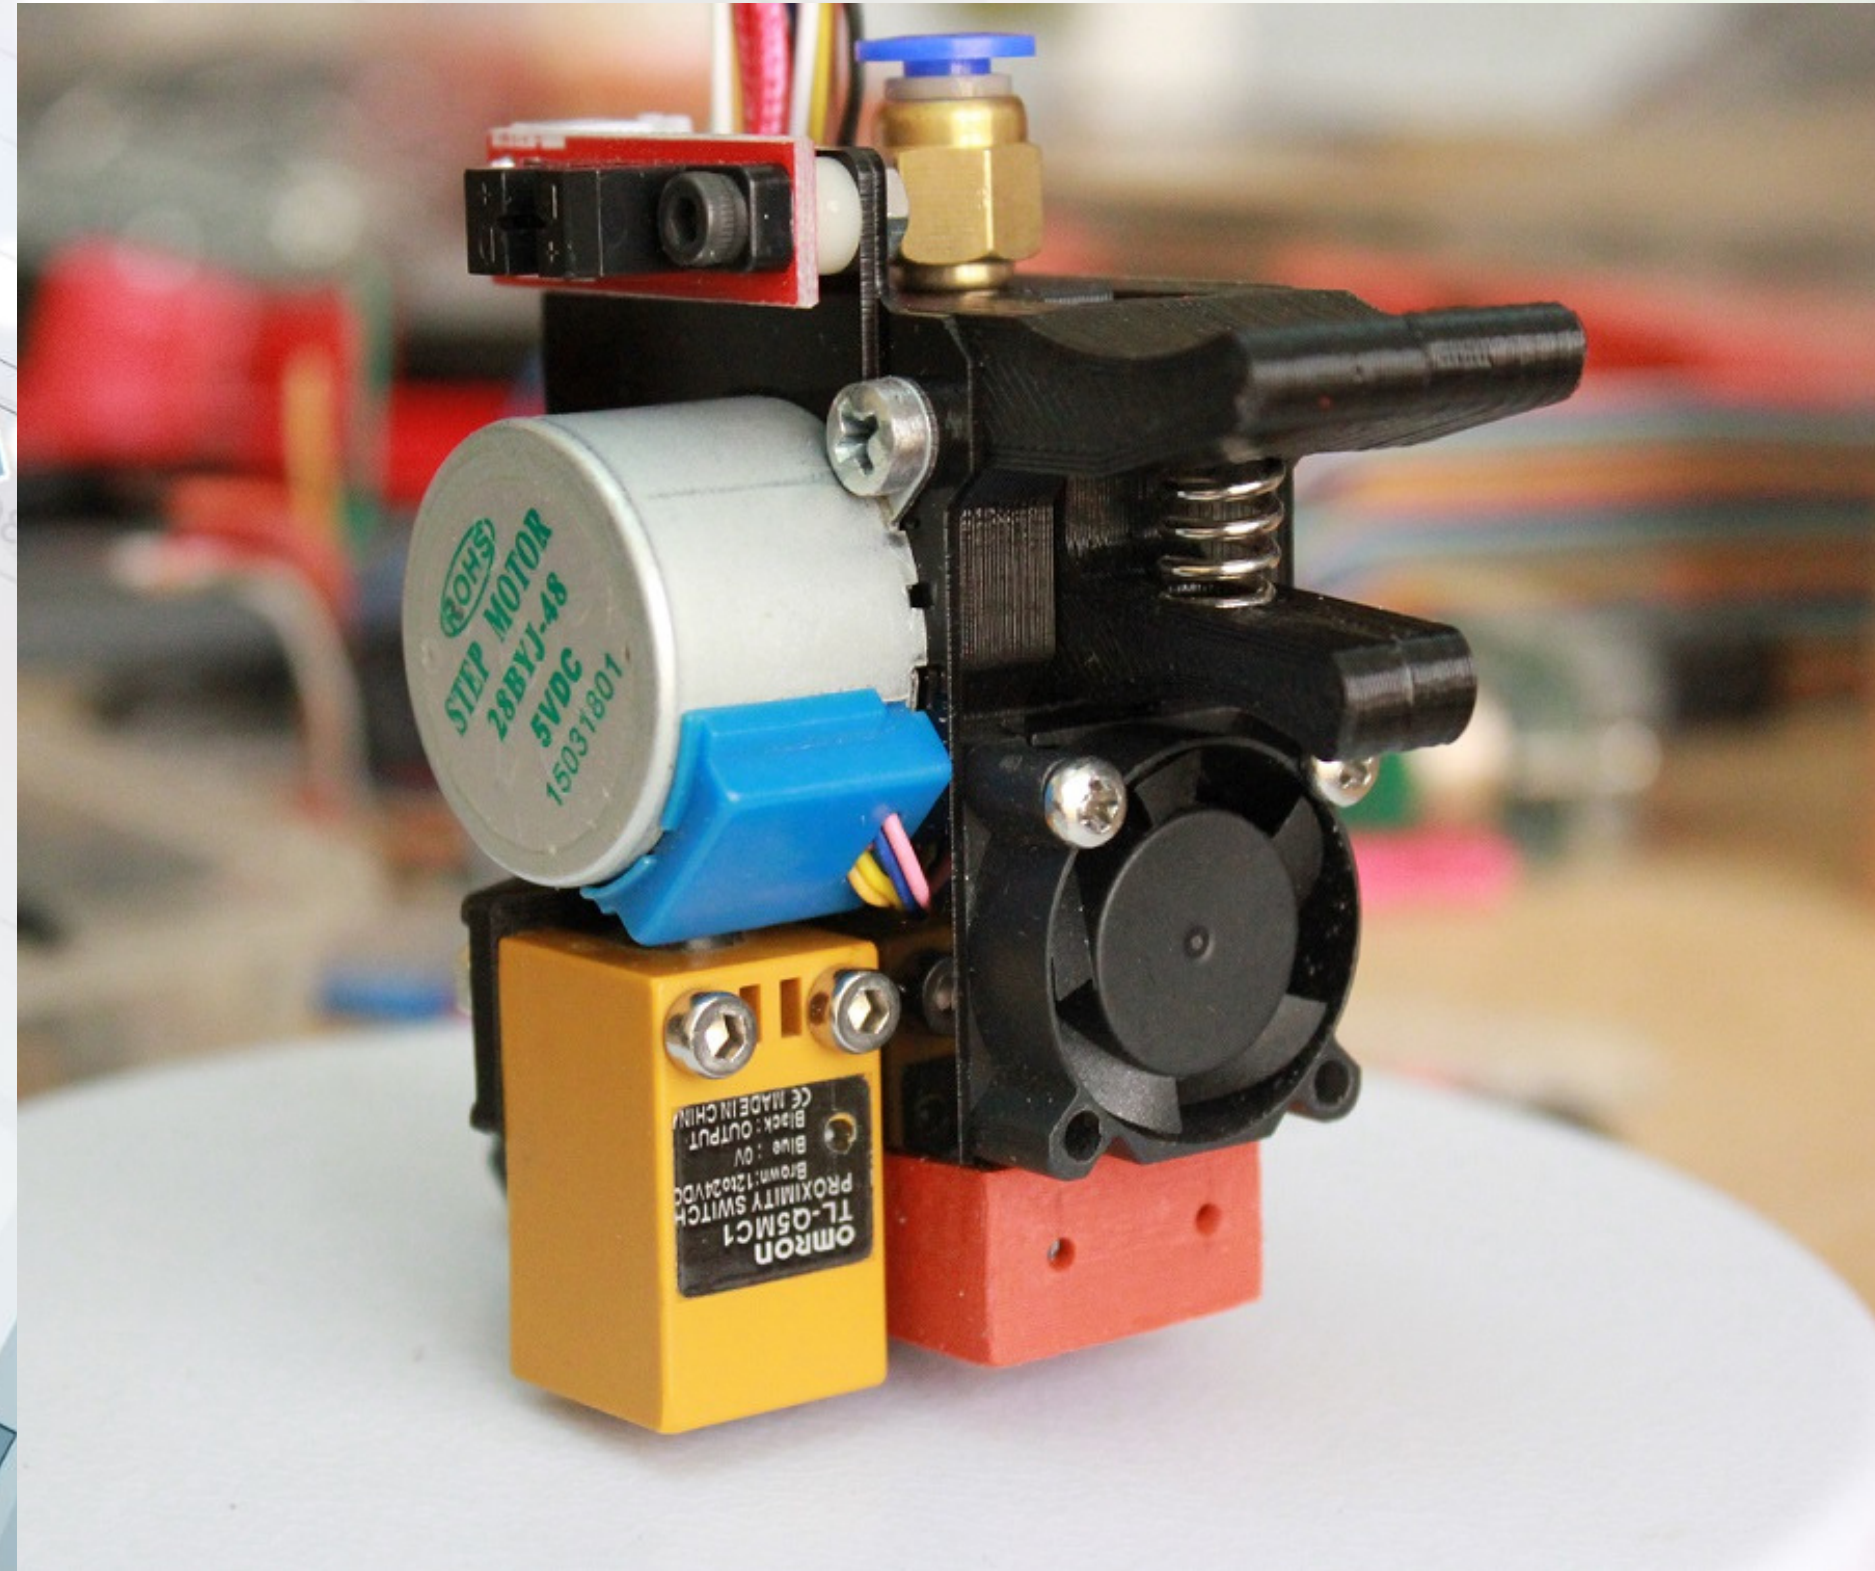

Introducing the latest innovation in FDM 3D printing technology - the ALTITUDE Delta 3D printer! With its sleek design and easy-to-use interface, you can now bring your creative ideas to life in just a few clicks. The ALTITUDE 3D printer boasts high-quality printing capabilities, producing intricate and precise details that will amaze you. Whether you're a hobbyist, artist, or entrepreneur, ALTITUDE 3D printer is perfect for unleashing your imagination and taking your creations to the next level.

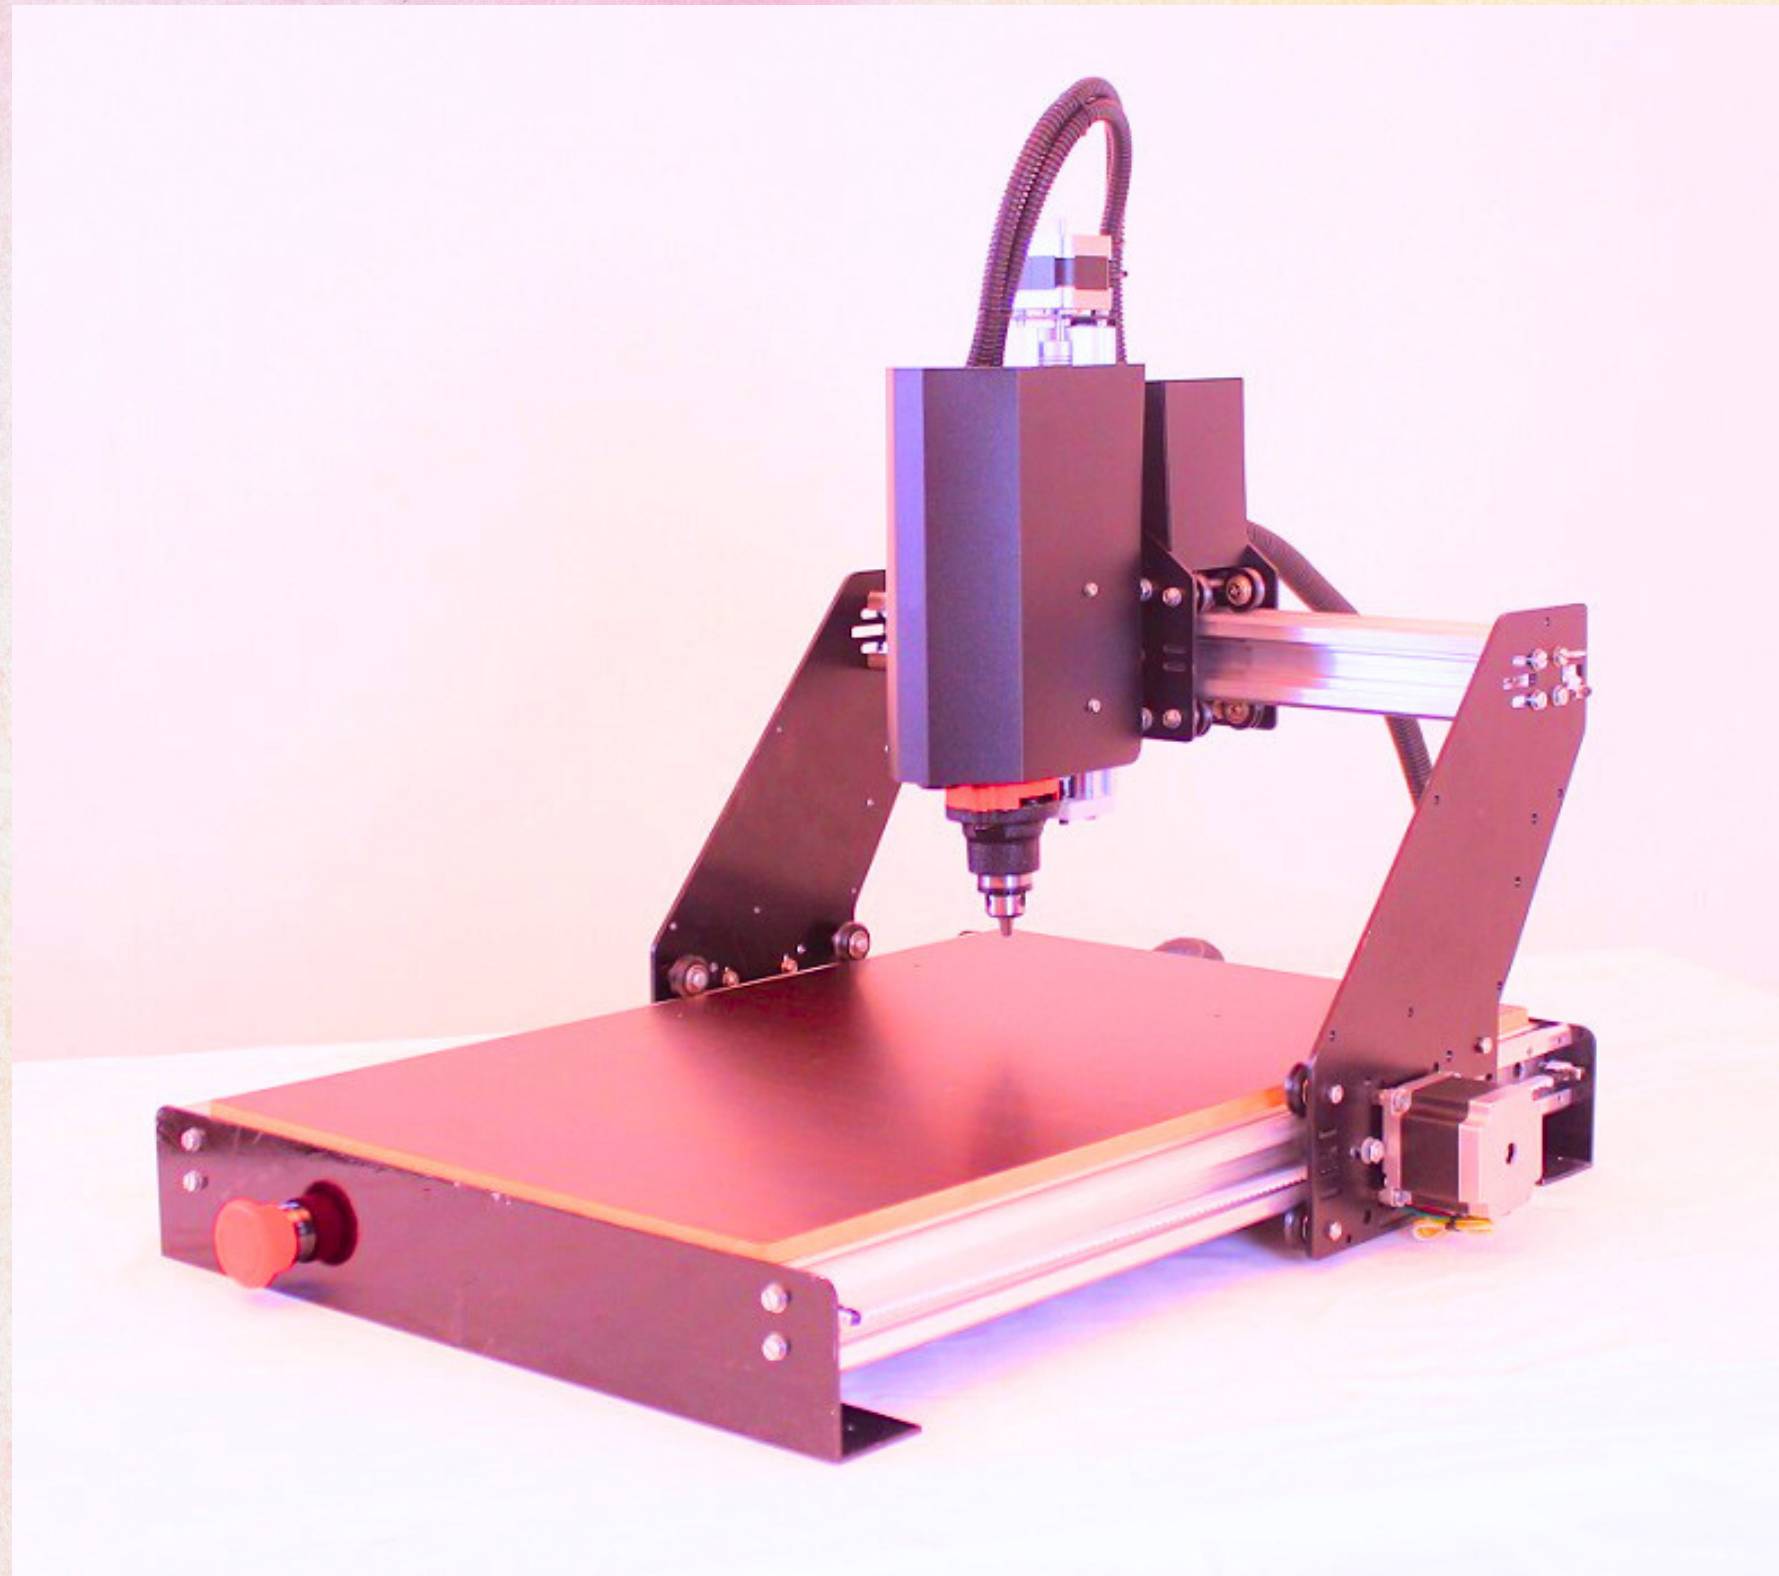

Compact 3D Printer Extruder - Ultzine LLC.

A compact and lightweight direct drive extruder that can print almost any kind of material reliably.

The U3D extruder is called the “World’s Lightest Direct Extruder” and that statement is almost true. With only 176 grams, it’s much lighter than other popular direct drive extruders like the E3D Hemera, Trianglelab Matrix Extruder, E3D Titan, etc.

Desktop Manufacturing Center (DMC) - Ultzine LLC.

The DMC is a professional 4-In-1 3D printer, laser engraver/cutter, drag knife cutter, and CNC mill that is designed specifically for desktop manufacturers. The DMC is undeniably built for the workshop and provides users with all of the manufacturing capabilities a DIY enthusiast could possibly want. When needed, users can switch out the single 3D printing head for a CNC tool, drag knife or a laser diode, meaning the sky's the limit when it comes to creative potential.

Vehicle Monitoring & Diagnostics System (VMDS) - Client

VMDS is an Android app for running OBD2 diagnostics. This cutting-edge software allows users to obtain information from the sensors of a car's Engine Management System (EMS). Besides, you can use it to read/clear codes and monitor the car's Engine Control Unit (ECU). VMDS is a fundamental app for car owners. It not only enables the ordinary person to scan the ECU and reset the CEL but it also makes vehicle monitoring a breeze.
